Summary

Software Developer with 5+ years of experience building robust and scalable applications. Proficient in **React**, **Laravel**, **NodeJS/Typescript**, **Python** and **PostgreSQL/MySQL**, with a proven track record of delivering high-quality, deadline-driven solutions. Passionate about continuous learning and leveraging modern technologies to create exceptional user experiences.

Experience

Transit Pro
Senior Software Developer
July 2024 - Present

As a **Senior Software Developer** at **Transit Pro**, a leading transportation solutions company, I design, develop, and maintain scalable backend systems using modern technologies like **Node.js (NestJS), Express, and MySQL**. I implement **CI/CD pipelines** to automate deployment processes, ensuring seamless updates and high system reliability. I collaborate with cross-functional teams to deliver efficient, user-friendly solutions, integrate third-party APIs, and optimize system performance. My work enhances **Transit Pro's** digital infrastructure, enabling smooth operations and innovative services in the transportation industry.

Guardup
Senior Backend Developer
July 2024 - November 2024

As a Backend Developer at GuardUp, a leading Nigerian security company, I developed and maintained secure, scalable web applications using NodeJS (NestJS). I collaborated with teams to deliver user-friendly solutions, managed databases, integrated APIs, and optimized performance. My work enhanced GuardUp's digital infrastructure, supporting its mission to provide innovative security services.

PFM.Company
Full-Stack Web Developer
November 2023 - June 2024

At PFM.Company, I integrated Bootstrap with Laravel to build visually appealing, responsive web applications. I leveraged Bootstrap's front-end components to create intuitive user interfaces, ensuring a seamless experience across devices. Within the Laravel framework, I developed robust backend functionalities to support smooth data flow and interactions. My role encompassed designing features, validating data, and optimizing performance to enhance user engagement.

Praxeum AI
Frontend Web Developer
May 30, 2023 - November 2023

At Praxeum AI, I played a key role in developing responsive, scalable, and performance-optimized client-side applications. My focus was on meeting the organization's business needs through effective application design and implementation.

Digi Essentials
Full Stack web developer
2022-02-12 - 2023-04-03

* Developed and maintained web applications using Laravel, PHP, and MySQL. * Integrated third-party APIs and services into web applications. * Worked closely with the frontend development team to ensure seamless integration and functionality. * Managed and optimized databases to ensure efficient query execution and data retrieval. * Conducted code reviews and implemented best practices for code quality and maintainability.

Empowered blockchain firm
backend web developer
2019-03-02 - 2022-12-08

*At Empowered Blockchain Firm, I managed and optimized blockchain-related databases using MySQL, PostgreSQL, and MongoDB. My role involved designing and maintaining secure, scalable, and high-performance databases to support decentralized applications (dApps) and blockchain networks. I also ensured the integrity and efficiency of data storage and retrieval, contributing to the seamless integration of blockchain technology with existing systems.
